Green: You have significant control over the content in these areas although things like the font sizes and colors are **strictly** controlled by pre-determined template styles. For specific information about what is controlled by the template styling, please contact the Web Group.

Yellow: You have more limited customization in these areas. For example, the banner in which your site title appears will always be in the white font and size you see below and you are limited to 55 characters.

Red: In these areas you have no control. The clearest examples of this in the screen shot below are the topper where Yale School of Medicine Appears and the footer.

Medical Approach to the Patient (MAP) - Internal Medicine Component Clerkship

Welcome to Internal Medicine! This clerkship will form a foundation for much of your professional life regardless of your eventual specialty. You will spend 8 of the next 12 week of the MAP clerkship on Internal Medicine which will be challenging, exciting, and instructive. As we internists and subspecialists care for our patients, we depend on broad understanding of basic and clinical science, critical thinking and problem-solving, and exceptional professionalism and interpersonal skill in working with the health care team.

Our primary goal is to help you become competent and eventually excel at the assessment and management of common and important problems in internal medicine. During your clerkship, we encourage you to learn systematically about internal medicine and in depth about each patient. Take responsibility for your patients - you will learn internal medicine best through active patient care.

You will find that in return for your hard work and best efforts, we expect your educational experience to be top-notch, and we demand that our faculty, residents, and staff are supportive and helpful to you. If they aren't, the Clerkship Director and Department Chair want to know!! Again, welcome to Internal Medicine - we look forward to working with you.

Goals and Objectives

These three categories of broad goals for the clerkship are not meant to be limiting you to other goals that you may want to focus on but are intended to clearly outline what we expect for you to achieve by the end of the 8 week Internal Medicine Clerkship.

Read More

Clerkship Expectations

This section will outline your role on the medical team, basic daily routine, specific expectations for Medicine 1 and Medicine 2 and for the clerkship in general. These are meant to be general guides and you should expect to get more team-specific expectations once you meet with your attending and resident.

Guidelines for Attendings and Residents

Every clerkship site is different, but various sites have given feedback that an outline of minimum expectations for students and their teachers (including residents) would be helpful. We hope that this will serve as a quick reference for these expectations.
